

EBENEZER A.A SAM

IT Specialist & Full-Stack Software Developer

Accra, Ghana • buggybigsam@gmail.com • (+233) 0244203222 • github.com/Buggybigsam • Founder, Saint Tech

PROFESSIONAL SUMMARY

Passionate software developer and Information Technology specialist focused on creating modern, scalable, and user-friendly digital solutions. Experienced in full-stack web engineering, resilient system architecture, database modeling, and practical AI integrations. Known for dependable project delivery, proactive communication, and crafting intuitive experiences that bridge human connection with technical precision.

EDUCATION

Bachelor of Science in Information Technology

| 2023 — 2026

Ghana Communication Technology University (GCTU) — Accra, Ghana

Key Areas: Software Engineering, Web & Cloud Systems, Database Management, Computer Networks, and UI/UX Design.

PROFESSIONAL EXPERIENCE & LEADERSHIP

Founder & Lead Developer

| 2024 — Present

Saint Tech — Software Development & Digital Infrastructure

- Architect and engineer custom full-stack web platforms and client management applications.
- Design responsive Next.js and TypeScript frontends paired with robust database backends.
- Manage client relationships, requirement gathering, deployment pipelines, and post-launch stability.

FEATURED PROJECTS

CraftConnect — Smart Booking for Local Artisans [TypeScript, Next.js, PostgreSQL, Tailwind CSS]

A specialized platform connecting local Ghanaian trade artisans with verified clients. Implemented conflict-free appointment scheduling, portfolio showcases, and real-time status notifications.

Apartment Booking Platform [TypeScript, React, Node.js, REST API]

Full-stack property rental and accommodation reservation system with interactive calendars, date validation, tenant inquiry management, and automated booking receipts.

Nova Stitch Studio [TypeScript, Next.js, PostgreSQL, UI/UX]

Bespoke digital atelier management system designed for tailoring and fashion creators. Features custom garment order tracking, client body measurement logs, and responsive lookbooks.

Face Recognition Attendance System [Python, OpenCV, Computer Vision]

Automated biometric attendance logger utilizing facial embeddings for real-time identification, liveness validation, and instant database check-in exports.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3, C++, Java

Frameworks & Tools: Next.js, React, Node.js, Express, Flask, FastAPI, Tailwind CSS, Git, Docker

Databases & Architecture: PostgreSQL, MySQL, MongoDB, SQLite, RESTful APIs, Database Schema Design

Specializations: Full-Stack Web Development, UI/UX Design, System Architecture, Computer Vision
